Event Organize to recognize the importance of Soil on 'World Soil Day-2023'

NBRI-EIACP organized a highly successful event in celebration of World Soil Day on 06.12.2023. The event was held at CSIR-NBRI, and it brought together a diverse group of students to raise awareness about the urgent need for conservation of soil.

World Soil Day is an annual event which is held on 5th December to focus attention on the importance of healthy soil and advocating for the sustainable management of soil resources.

EIACP recognized the importance of this day and organized an event to inform, inspire, and mobilize individuals to take concrete steps towards a more sustainable future.

In an interactive session with students of Kendriya Vidyalaya, IIT Kanpur, Dr. Pankaj Kumar Srivastava, Coordinator, NBRI-EIACP, gave the opening remarks on soil and water and their interconnections.

Dr. N. Manika, Programme Officer, NBRI-EIACP, went into detail regarding the importance of soil in supporting human health, ecosystems, and the production of food. She also discussed how the SDGs relate to the efficient management of soil.

Dr. Anju Patel, Co-Coordinator, NBRI-EIACP, explained how human behaviour affects soil quality and how to stop it from deteriorating.

Mission Life Pledge was also taken on the occasion. More than 145 students attended the event. The event successfully raised awareness about valuable linkages between soil and water, fostering a greater understanding among the participants.

The International Day of Climate Action event was a crucial milestone in the promotion of soil health and the empowerment and involvement of people in nurturing a sustainable future.
